

nsb Chain - Clean room type

>> General information

Item	Value
Material	CPS-Amid(PA6+GF), RoHs
Noise level	30dB(DIN EN 61672-1)
Speed	5m/s
Acceleration	15m/s²
Temperature	-30℃ ~+130℃
Special production	ESD, UV, Customized color
Certificate	CE, IPA, ATEX(Ex), TUV

>> Calculation table

Item	Value
Length of Cable Chain	$L = \frac{1}{2} \times LS + LP$
Bending Radius	
The biggest Cable inserted	Multiply 8~10 and the biggest cable
The biggest Hydraulic Hose inserted	Multiply 15~20 and the biggest hose

>> Dimension table

» Characteristics of nsb Chain Cleanroom

- Low Noise due to innovative design of side band.

nsb CR type

nsb N type

As it's designed differently compared to Normal type that has more friction space when assembled. It means that CR type has less friction space each other when assembled, thus, it makes low noise during operation.

- The Quietest Cable Chain in the world

- Low Dust Cable Chain

- Section composition method

You should make section composition every second frames to make sure long lifetime of cables by preventing from twisting and lost of cables inside. (It's strongly recommended for customers who want to use for long time). It's basic issue and one of the most important factors showing long lifetime of cables.

You can make suitable section composition by using our diverse our dividers and separators that can be modified from 20mm ~ 600mm.

» Application of nsb Chain Clean Room type

- **NSB 022CR** Application: Testing machine for Lead application Location: Korea

- **NSB 035CR** Application: LCD Cleaner Line Location: Korea

nsb Chain - Clean room type

>> Part of nsb Chain Clean Room type

1 Frame (FR)

Hinged-type frame, open one side, supports connection of both side of side band and have tongue and groove system plate to secure the position of the divider on the frame.

2 Side Band (SB)

It's part of cable chain that each side band's connected by holding band.

3 FREE END BRACKET (FEB)

A unit that connects at last side band (left&right). It can be fixed stronger using steel washers.

4 Divider (DV-S, M, R, T)

A unit that divides inserted cables horizontally.

5 Separators (SP)

A unit that divides inserted cables vertically to prevent twisting and breaking problem.

6 Tie wrap (TW)

A unit that ties cables to maintain straightness of them. It can be assembled to bracket directly or installed separately from bracket.

7 System tie wrap (STW)

System-Tie Wrap has to be assembled on fixing and moving point of bracket and can be assembled without any tie wrap plate. This tie wrap is used to stay the cables on several floors prevent the cables from being twisting and it can also be assemble without any tools or bolt. This tie wrap has two types, one is to assemble inside bracket the other one is outside.

>> Assembly procedure of nsb Chain Clean room Type

The assembling process of CR-Type of New Sabin Chain is like below and users must use rubber hammer with careful combination of Divider and Separator.

1 Connect each side band as many as you need.

2 Assemble the end brackets on both ends.

3 Attach frames to one side groove on the frames, then the other side.

3-1 For nsb020CR and nsb022CR, they are not Hinge Type for method to connect frames, but Hook Type on both sides.

4 For nsb 045, 060, and 075, connect the pin of separator in hole of divider after inserting separator in hole of divider. For nsb028 and nsb035, separator fixing pins are not used.

5 Fix the separator and divider patterns to the bottom-side frames as needed.

6 Attach frames to one side groove on the frames, then the other side.

6-1 For nsb020CR and nsb022CR, they are not Hinge Type for method to connect frames, but Hook Type on both sides.

7 Insert frame pins to secure the frames and complete carrier. (nsb045, 060, 075 are applied with frame pin, and nsb028, 035 are Hinge Type or Hook Type without frame pin.)

8 Complete to assemble New Sabin CR-Type, Sabin Chain.

nsb Chain - Clean room type

>> Part list of nsb Chain Clean Room type

- Composition of Cable chain(Standard)
= Side band(RH) + Frame + Side band(LH) + Bending radius Unit + Free end bracket
 - M divider(normal divider) should be applied every second frames to make a section composition.
- ※ Please refer to below part list and description to understand composition of cable chain.
