

FEATURES

- Highly Integrated Microstepping Driver, Intelligent Variable Speed Controller and NEMA 34 High Torque 1.8° Brushless Step Motor
- Advanced 2nd Generation Current Control for Exceptional Performance and Smoothness
- Single Supply: +12 to +75 VDC
- · Cost Effective
- · Extremely Compact
- 20 Microstep Resolutions up to 51,200 Steps Per Rev Including: Degrees, Metric, Arc Minutes
- 2 Selectable 10-bit Analog Speed Control Inputs Accept:
 - 0 to +5 VDC
 - 0 to +10 VDC
 - 4 to 20 mA
 - 0 to 20 mA
- 15 to 25 kHz PWM
- Automatic Current Reduction
- Electronically Configurable:
- Motor Run/Hold Current
- Microstep Resolution
- Acceleration/Deceleration
- Initial and Max Velocity
- Hold Current Delay Time/Motor Settling Delay Time
- Programmable Filtering for the Start/Stop Input
- Available Options:
 - Long Life Linear Actuators**
 - Internal Optical Encoder
 - Integrated Planetary Gearbox
 - Control Knob for Manual Positioning
 - Linear Slide
- · 3 Rotary Motor Lengths Available
- Setup Parameters May Be Switched On-The-Flv
- · Interface Options:
 - Pluggable Locking Wire Crimp
 - 12.0" (30.5cm) Flying Leads
- Graphical User Interface (GUI) for Quick and Easy Parameter Setup

The MDrive34Plus² Speed Control offers system designers cost effective, programmable velocity control integrated with a NEMA 34 high torque 1.8° brushless step motor and a +12 to +75 volt microstepping driver.

The MDrive34Plus² Speed Control features a digital oscillator for accurate velocity control with an output frequency of up to 5 Megahertz. Output frequency will vary with the signal applied to the speed control input and can be limited by the amount specified by the Maximum Velocity parameter.

Speed can be adjusted using three modes of operation: voltage, current and PWM. The ranges are 0 to +5 volts and 0 to +10 volts in voltage mode, 0 to 20 mA and 4 to 20 mA in current mode, and 15 to 25 kHz in PWM mode. Voltage and current modes provide two configurable speed control inputs, Speed A1 & Speed A2, which may be preset and digitally selected.

There are two basic methods for controlling the velocity: bidirectional and unidirectional. By moving the center point, both speed and direction are controlled by a potentiometer or joystick. By setting the center point to zero or the lower end of the potentiometer, only velocity is controlled by the speed control input; direction is controlled by a separate digital input.

The MDrive34Plus² Speed Control has 21 setup parameters, which may be configured using the supplied IMS Analog Speed Control GUI, or a user-developed front-end communicating over SPI. The setup parameters enable the user to configure all MDrive operational parameters which are stored in nonvolatile memory.

The versatile, compact MDrive34Plus² Speed Control is available in multiple configurations to fit various system needs. Rotary motor versions come in three lengths and may include an optical encoder, control knob, planetary gearbox or linear slide. Long life Acme screw linear actuators** are also available.

Connector style options give you choices for the best fit and features. Select from 12.0" (30.5cm) flying leads or locking wire crimp connectors.

MDrivePlus connectivity has never been easier with options ranging from all-inclusive QuickStart Kits to individual interfacing cables and mating connector kits to build your own cables. See pg 5.

The MDrive34Plus² is a compact, powerful and cost effective motion control solution that will reduce system cost, design and assembly time for a large range of brushless step motor applications.

CONFIGURING

The IMS Analog Speed Control is a software GUI for quick and easy parameter setup of the MDrivePlus Speed Control from a computer's USB port. GUI access is via the IMS SPI Motor Interface available at www.imshome.com. The IMS interface is also used to upgrade MDrive-Plus Speed Control firmware.

IMS Analog Speed Control features:

- · Easy installation.
- Automatic detection of MDrivePlus version and communication configuration.
- · Will not set out-of-range values.
- Tool-tips display valid range setting for each option.
- Simple screen interface.

CONNECTIVITY

new QuickStart Kit

For rapid design verification, all-inclusive QuickStart Kits have communication converter, prototype development cable(s), instructions and CD for MDrivePlus initial functional setup and system testing.

Communication Converters

Electrically isolated, in-line converters pre-wired with mating connectors to conveniently set/program communication parameters for a single MDrivePlus via a PC's USB port. Length 12.0' (3.6m).

Mates to connector:MD-CC300-001 10-Pin IDC 10-Pin Wire Crimp MD-CC302-001

Prototype Development Cables

Speed test/development with pre-wired mating connectors that have flying leads other end. Length 10.0' (3.0m).

Mates to connector:

12-Pin Wire Crimp PD12B-2334-FL3 20-Pin Wire Crimp PD20B-3400-FL3

Mating Connector Kits

Use to build your own cables. Kits contain 5 mating shells with pins. Cable not supplied. Manufacturer's crimp tool recommended.

Mates to connector: 10-Pin Wire Crimp CK-02 12-Pin Wire Crimp CK-08 20-Pin Wire Crimp CK-11

Kit contains 5 mating connectors that press fit onto ribbon cable. Cable not supplied.

10-Pin IDCCK-01

OPTIONS

Linear Actuator * *

The MDrive34Plus² is offered with numerous linear actuator styles and options to satisfy a broad range of linear motion applications. Contact the factory for details or see: www.imshome.com/mdriveplus_linear_actuator.html

Internal Encoder

Internal optical encoders, single-end or differential styles, are offered factory-mounted with MDrive34Plus² Speed Control products. Refer to the table below.

Line Count	100	200	250	256	400	500	512	1000	1024
Single-End part#	E1	E2	E3	EP	E4	E5	EQ	E6	ER
Differential part# †	EΑ	EB	EC	EW	ED	EH	EX	EJ	EY

†MDrives with pluggable interface available with Differential Encoder only.

Control Knob

The MDrive34Plus² Speed Control is available with a factorymounted rear control knob for manual shaft positioning.

Planetary Gearbox

Efficient, low maintenance planetary gearboxes are offered assembled with the MDrive34Plus. Refer to details and part numbers on the back cover.

Linear Slide

Integrated linear slides are available factory installed for precision linear movement. Screw leads are 0.1", 0.2", 0.5' or 1.0" of travel per rev. Slides are 12.0" (30.5cm) to 42.0" (106.7cm) long. Contact factory for custom lengths. Refer to separate datasheet or web site for complete details.

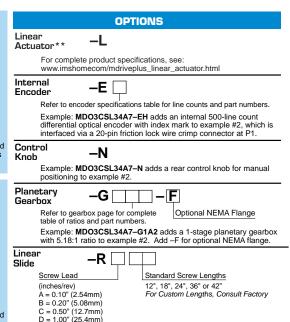

**Consult Factory for Availability.

Connectivity details: www.imshome.com/cables_cordsets.html

PART NUMBERING

**Consult Factory for Availability.

Example: MDO3CSL34A7-RA12 adds a Linear Slide with 0.10" screw lead, 12" long to example #2.

MDRIVE34PLUS WITH PLANETARY GEARBOX

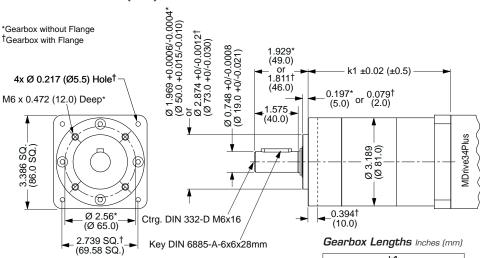

The MDrive34Plus is available with a Planetary Gearbox option developed to increase torque at lower speeds, enable better inertia matching and produce finer positional resolutions. These efficient, low maintenance Planetary Gearbox come fully assembled with the MDrive and are offered in a large number of reduction ratios in 1-, 2- and 3-stage configurations. An optional NEMA Output Flange allows mounting the Planetary Gearbox to the load using a standard NEMA bolt circle. Planetary Gearbox may be combined with other MDrive34Plus options, however are unavailable with Linear Actuators.

Planetary Gearbox Parameters

				Maximum Backlash	Output Side with Ball Bearing
